Premium 95 has no terminal gate price of its own. We use the unleaded price, so the premium grade’s extra wholesale cost sits in its retail difference, and we give no margin for it.

Retail: FuelRadar station-day averages for Sydney; our retail records begin on 13 April 2026, so a period before then has the wholesale side only, and “dearest” and “cheapest” compare the periods since our records began. Last year’s average is the previous calendar year. Until we have a full calendar year of retail prices it shows the wholesale side only: the terminal gate price, crude oil and excise. Its GST, retail difference and margin need a retail price, so they are left out. Terminal gate price: AIP, Sydney terminal, carried over weekends. Crude oil is the US Energy Information Administration Brent spot price (FRED series DCOILBRENTU), converted to Australian cents a litre at each day’s exchange rate (FRED series DEXUSAL) and 158.987 litres a barrel, then averaged over the days both are published. Excise: ATO, averaged over the period’s days. Wholesale is the terminal gate price without GST and excise, less crude oil. GST is one eleventh of the retail price. The retail difference is what is left: the retailer’s costs and margin, without its GST. Bands are rounded so they add up to the retail price.

Month by month

In Sydney, the U91 average started the month at 202.2 c/L, peaked at 238.6 c/L on 22 September 2026, and ended at 237.1 c/L. The diesel average opened at 247.8 c/L, reached its highest day at 282.9 c/L on 22 September 2026, and closed the month at 280.9 c/L.

The gross indicative retail margin is the retail average less the terminal gate price, both with GST. It is before the retailer's own costs (rent, wages, freight to the site, card fees), so it is not profit. The terminal gate price is AIP's price at the Sydney terminal. AIP publishes terminal gate prices for the capital-city terminals only, so a regional town is measured against the capital's terminal, and its margin includes the cost of getting fuel there. Weekday prices are carried over weekends and public holidays.

Market trends this year

The terminal gate price at the Sydney terminal averaged 218.2 c/L for unleaded and 258.3 c/L for diesel. Brent crude oil averaged 101.4 Australian cents a litre, with an exchange rate of 71.15 US cents per Australian dollar.

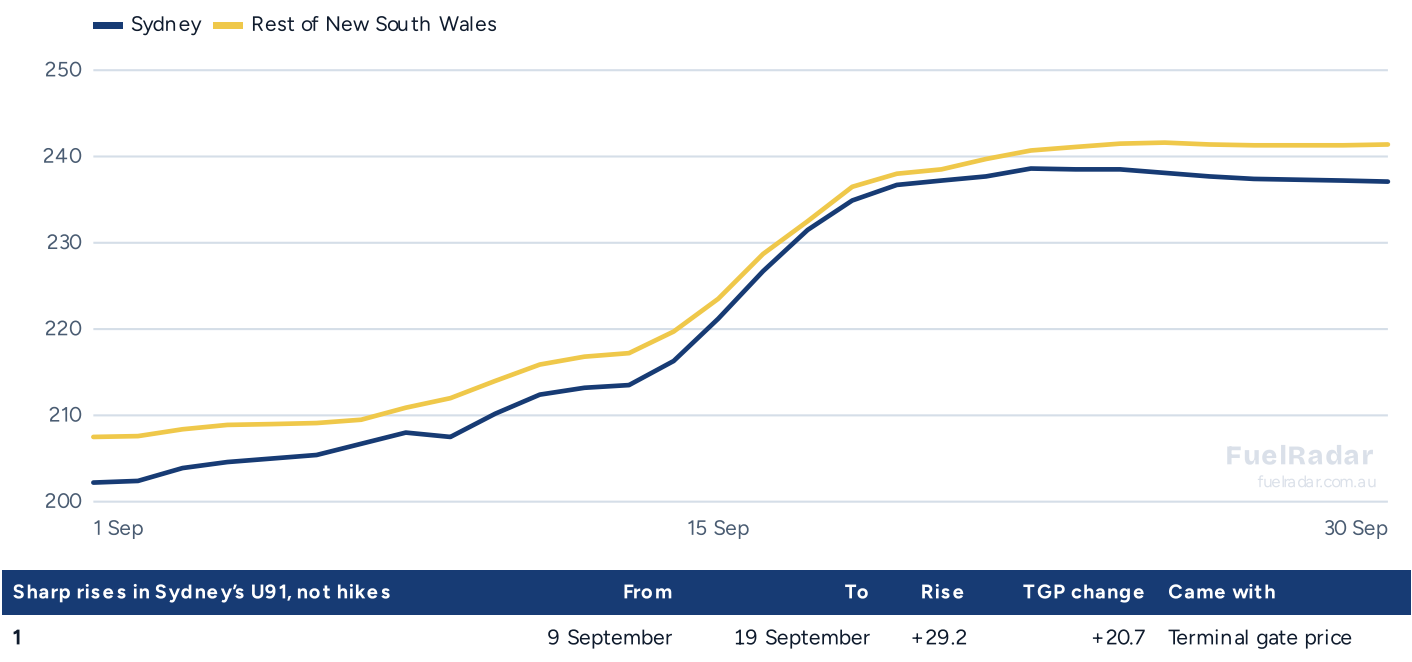

Retail: FuelRadar daily averages for Sydney, from 13 April 2026 when our records begin. Terminal gate prices (dashed): AIP, Sydney terminal, weekdays. Brent crude: US EIA spot price via FRED, converted at each day's exchange rate and 158.987 litres a barrel.

US cents per Australian dollar, the Federal Reserve's noon buying rate in New York, via FRED.

The price cycle and excise

No regular price cycle ran in Sydney in the period, so prices followed wholesale costs. The sharp rise of 29.2 c/L between 9 September 2026 and 19 September 2026 came with the terminal gate price.

How we count a price-cycle hike: Sydney's daily U91 average less the Sydney terminal gate price (the indicative margin) rises by at least 8.0 c/L within 5 days, the retail average rises as much, stations making up at least 25% of Sydney's raise their price by 5.0 c/L or more in a day, and the margin then eases back by half within 21 days. A rise within 3 days of an excise change, or one the terminal gate price explains, is not a hike. With no hike, no regular price cycle ran and prices followed wholesale costs.

Fuel excise

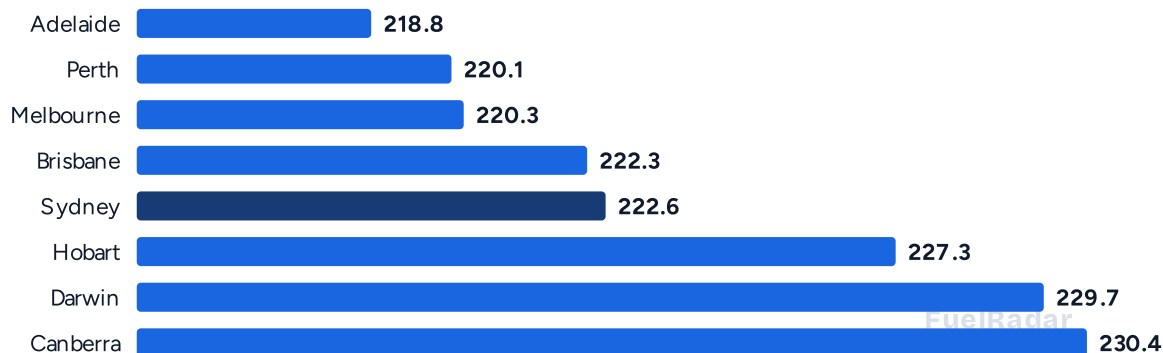

The fuel excise rate stayed at 53.7 c/L throughout the period.

Excise is charged on fuel as it leaves the terminal, so it is already in the terminal gate price; GST is then charged on top.

The capital cities

Sydney was fifth cheapest of the 8 capital cities for U91 and second cheapest of the 8 capital cities for diesel. Adelaide was the cheapest capital for U91 and Canberra was the dearest, while Perth was the cheapest for diesel and Canberra was the dearest.

Areas are the ABS Statistical Areas Level 4 (SA4, 2021) inside Sydney's urban area, named in plain words ("Brisbane – East" is Brisbane East). An area counts its stations that reported on at least a quarter of the days; its average, station count and cheapest station all come from them, so the cheapest station never averages more than its area.

Regional towns

Heddon Greta was the cheapest town for U91 at 206.0 c/L and Ivanhoe was the dearest at 294.9 c/L, a spread of 88.9 c/L. For diesel, Williamtown was the cheapest at 252.0 c/L and Ivanhoe was the dearest at 339.9 c/L. We found 69 of the 228 ranked towns were cheaper than Sydney for U91, and 30 of 168 were cheaper for diesel.

A town is the ABS locality a station sits in; a station in a large regional city (marked “city”) counts in that city as one place. A town is ranked with at least 2 stations that reported on a quarter of the days and a price on 60% of the days. Its margin is against Sydney’s terminal gate price, so it includes the cost of carrying fuel to the town.

Regional centres

Muswellbrook, with 10,000 to 19,999 people, was the cheapest regional centre for U91 at 216.4 c/L, while Moama, with 20,000 to 49,999 people, was the dearest at 243.0 c/L. Of the regional centres we ranked, 15 averaged less than the capital.

Each day's average against the seven days centred on it, averaged by weekday, so a steady rise or fall over the period does not favour one end of the week. A place needs four of each weekday with prices from 5 stations or more; a month usually has too few, so it shows the year so far only.

A 60-litre tank, and the towns that moved most

Filling a 60-litre tank with U91 in Heddon Greta rather than in Ivanhoe saved \$53.34, and saved \$9.96 compared to the Sydney average. Buying at METRO HEDDON GRETA in Heddon Greta saved \$27.00 on a tank against the state average.

Brent: Europe Brent spot price FOB (US Energy Information Administration). Exchange rate: the Federal Reserve's noon buying rate in New York. Both via FRED, Federal Reserve Bank of St. Louis, averaged over the days each is published; the Australian-dollar figures use each day's rate. A litre is a barrel ÷ 158.987. We use these free benchmarks because the refined-petrol and diesel benchmarks Australian wholesale prices follow (Singapore) are sold by subscription.

Outlook

An estimate, not a guarantee. Our outlook describes the days after the period ended. Prices can move quickly; check the live price at the station before you fill.

We give our outlook only in the days after a period ends, when it still describes the days ahead. See today's forecast for your area in the FuelRadar app or at fuelradar.com.au/fuel-price-reports/nsw/2026-09.

Data quality, method and sources

We analysed prices from 2,278 service stations for this report, with our price records starting on 13 April 2026.

Service stations listed	2,301
Stations that reported a price in the period	2,278
Station-days counted (every fuel)	228,832
Days covered	1 September 2026 to 30 September 2026
Our price records begin	13 April 2026
Towns ranked for U91 (left out: too few steady stations)	228 (314)

The station-day average

Each day, every service station counts once at its latest price as of the end of that day, in the state's own time. A price is carried forward for at most 30 days, and each average is taken over every station-day in the period. Prices held for checking, prices a station reported as unavailable and implausible prices are left out (we count U91 between 100.0 and 450.0 c/L).

Places

Sydney is its ABS urban area, split into ABS SA4 areas. Outside it, a town is the ABS locality a station sits in. A town or area counts its stations that report on at least a quarter of the days and is ranked with at least 2 of them and a price on 60% of the days.

Wholesale, margins and the cost of a litre

The terminal gate price is AIP's weekday price at the nearest terminal: the Sydney terminal. AIP publishes the capital-city terminals only. Weekday prices are carried over weekends, and a period's price is the mean of its calendar days. The margin is the retail average less the terminal gate price. Crude oil is the US Energy Information Administration Brent spot price (FRED series DCOILBRENT EU), converted to Australian cents a litre at each day's exchange rate (FRED series DEXUSAL) and 158.987 litres a barrel, then averaged over the days both are published. In the cost of a litre, wholesale is the terminal gate price without GST and excise less crude oil, excise is the ATO rate averaged over the days, GST is one eleventh of the retail price, and the retail difference is the rest. Last year's average is the previous calendar year. Until we have a full calendar year of retail prices it shows the wholesale side only: the terminal gate price, crude oil and excise. Its GST, retail difference and margin need a retail price, so they are left out.

About these prices
