Premium 95 has no terminal gate price of its own. We use the unleaded price, so the premium grade’s extra wholesale cost sits in its retail difference, and we give no margin for it.

Retail: FuelRadar station-day averages for Brisbane; our retail records begin on 13 April 2026, so a period before then has the wholesale side only, and “dearest” and “cheapest” compare the periods since our records began. Last year’s average is the previous calendar year. Until we have a full calendar year of retail prices it shows the wholesale side only: the terminal gate price, crude oil and excise. Its GST, retail difference and margin need a retail price, so they are left out. Terminal gate price: AIP, Brisbane terminal, carried over weekends. Crude oil is the US Energy Information Administration Brent spot price (FRED series DCOILBRETEU), converted to Australian cents a litre at each day’s exchange rate (FRED series DEXUSAL) and 158,987 litres a barrel, then averaged over the days both are published. Excise: ATO, averaged over the period’s days. Wholesale is the terminal gate price without GST and excise, less crude oil. GST is one eleventh of the retail price. The retail difference is what is left: the retailer’s costs and margin, without its GST. Bands are rounded so they add up to the retail price.

Month by month

Brisbane's U91 average for September 2026 was 222.3 c/L, while diesel averaged 271.8 c/L. The capital's U91 price started the month at 202.1 c/L on 1 September 2026, peaked at 238.1 c/L on 24 September 2026, and ended at 235.9 c/L on 30 September 2026.

The gross indicative retail margin is the retail average less the terminal gate price, both with GST. It is before the retailer's own costs (rent, wages, freight to the site, card fees), so it is not profit. The terminal gate price is AIP's price at the Brisbane terminal. AIP publishes terminal gate prices for the capital-city terminals only, so a regional town is measured against the capital's terminal, and its margin includes the cost of getting fuel there. Weekday prices are carried over weekends and public holidays.

Market trends this year

The terminal gate price at the Brisbane terminal averaged 218.1 c/L for unleaded and 258.8 c/L for diesel. Brent crude oil averaged 101.4 c/L in Australian terms, with an exchange rate of 71.15 US cents to the Australian dollar.

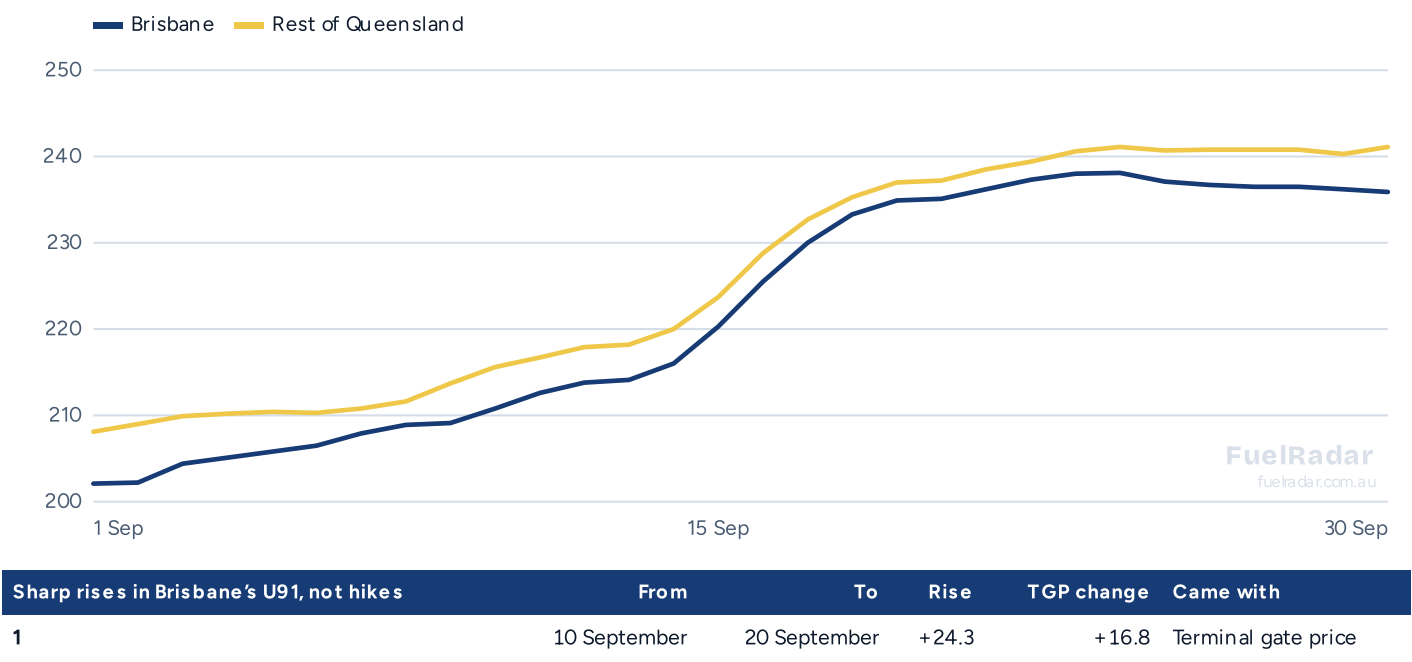

Retail: FuelRadar daily averages for Brisbane, from 13 April 2026 when our records begin. Terminal gate prices (dashed): AIP, Brisbane terminal, weekdays. Brent crude: US EIA spot price via FRED, converted at each day's exchange rate and 158.987 litres a barrel.

US cents per Australian dollar, the Federal Reserve's noon buying rate in New York, via FRED.

The price cycle and excise

No regular price cycle ran in Brisbane in the period, so prices followed wholesale costs. A sharp rise of 24.3 c/L between 10 September 2026 and 20 September 2026 came with the terminal gate price.

How we count a price-cycle hike: Brisbane's daily U91 average less the Brisbane terminal gate price (the indicative margin) rises by at least 8.0 c/L within 5 days, the retail average rises as much, stations making up at least 25% of Brisbane's raise their price by 5.0 c/L or more in a day, and the margin then eases back by half within 21 days. A rise within 3 days of an excise change, or one the terminal gate price explains, is not a hike. With no hike, no regular price cycle ran and prices followed wholesale costs.

Fuel excise

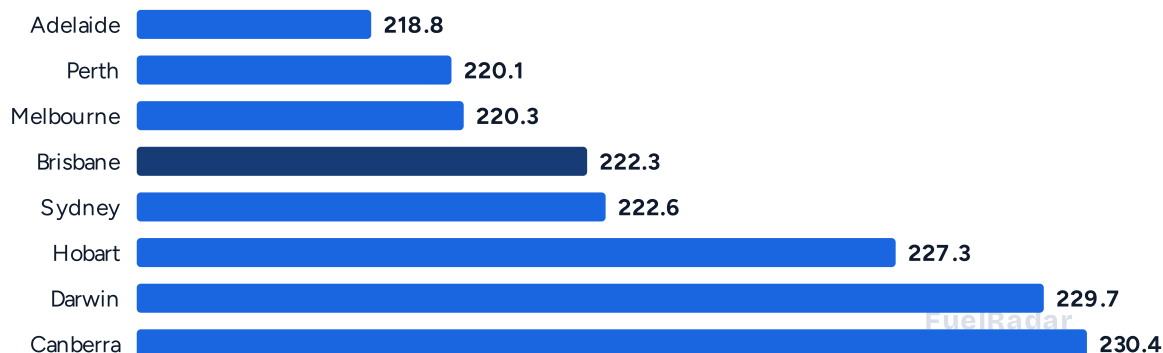

The fuel excise rate stayed at 53.7 c/L throughout the period.

Petrol and diesel excise	Rate (c/L, before GST)	Change

Average over the days of 1 September to 30 September 2026	53.7

Excise is charged on fuel as it leaves the terminal, so it is already in the terminal gate price; GST is then charged on top.

The capital cities

Brisbane was the fourth cheapest of the 8 capital cities for U91 and the fifth cheapest of the 8 capital cities for diesel. Adelaide was the cheapest capital for U91 at 218.8 c/L, while Canberra was the dearest at 230.4 c/L.

Each capital is its ABS urban area, worked out exactly as in its own state's report. The margin is against its own terminal's gate price (Canberra uses Sydney's). Green is the cheapest capital and red the dearest.

Brisbane by area

Brisbane South was the cheapest of the capital's ABS SA4 areas for U91 at 218.8 c/L, while Moreton Bay South was the dearest at 225.7 c/L. This created a spread of 6.9 c/L across the Brisbane areas.

Areas are the ABS Statistical Areas Level 4 (SA4, 2021) inside Brisbane's urban area, named in plain words ("Brisbane - East" is Brisbane East). An area counts its stations that reported on at least a quarter of the days; its average, station count and cheapest station all come from them, so the cheapest station never averages more than its area.

Regional towns

Purga was the cheapest town for U91 at 211.4 c/L, while Quilpie was the dearest at 261.6 c/L, creating a spread of 50.2 c/L. For diesel, Yarraman was the cheapest at 255.8 c/L and Thargomindah was the dearest at 315.8 c/L, with 52 towns averaging less than the capital for U91.

A town is the ABS locality a station sits in; a station in a large regional city (marked “city”) counts in that city as one place. A town is ranked with at least 2 stations that reported on a quarter of the days and a price on 60% of the days. Its margin is against Brisbane’s terminal gate price, so it includes the cost of carrying fuel to the town.

Regional centres

Dalby, with 10,000 to 19,999 people, was the cheapest regional centre for U91 at 218.6 c/L, while Mount Isa, with 10,000 to 19,999 people, was the dearest at 243.8 c/L. Ten regional centres averaged less than the capital for the period.

Each day's average against the seven days centred on it, averaged by weekday, so a steady rise or fall over the period does not favour one end of the week. A place needs four of each weekday with prices from 5 stations or more; a month usually has too few, so it shows the year so far only.

A 60-litre tank, and the towns that moved most

Filling a 60-litre tank with U91 in Purga rather than in Quilpie saved \$30.12 on average, and \$6.54 against Brisbane. Buying fuel at Pearl Energy Cannon Hill in Cannon Hill saved \$11.22 against the state average.

Service stations listed	1,776
Stations that reported a price in the period	1,736
Station-days counted (every fuel)	170,952
Days covered	1 September 2026 to 30 September 2026
Our price records begin	13 April 2026
Towns ranked for U91 (left out: too few steady stations)	156 (254)

The station-day average

Each day, every service station counts once at its latest price as of the end of that day, in the state's own time. A price is carried forward for at most 30 days, and each average is taken over every station-day in the period. Prices held for checking, prices a station reported as unavailable and implausible prices are left out (we count U91 between 100.0 and 450.0 c/L).

Places

Brisbane is its ABS urban area, split into ABS SA4 areas. Outside it, a town is the ABS locality a station sits in. A town or area counts its stations that report on at least a quarter of the days and is ranked with at least 2 of them and a price on 60% of the days.

Wholesale, margins and the cost of a litre

The terminal gate price is AIP's weekday price at the nearest terminal: the Brisbane terminal. AIP publishes the capital-city terminals only. Weekday prices are carried over weekends, and a period's price is the mean of its calendar days. The margin is the retail average less the terminal gate price. Crude oil is the US Energy Information Administration Brent spot price (FRED series DCOILBRENT EU), converted to Australian cents a litre at each day's exchange rate (FRED series DEXUSAL) and 158.987 litres a barrel, then averaged over the days both are published. In the cost of a litre, wholesale is the terminal gate price without GST and excise less crude oil, excise is the ATO rate averaged over the days, GST is one eleventh of the retail price, and the retail difference is the rest. Last year's average is the previous calendar year. Until we have a full calendar year of retail prices it shows the wholesale side only: the terminal gate price, crude oil and excise. Its GST, retail difference and margin need a retail price, so they are left out.

About these prices

These are averages over the whole period, not today's prices. Check the station price and its update time before you fill. The full report, with every town linked to its live prices, is at fuelradar.com.au/fuel-price-reports/qld/2026-09.
