Premium 95 has no terminal gate price of its own. We use the unleaded price, so the premium grade’s extra wholesale cost sits in its retail difference, and we give no margin for it.

Retail: FuelRadar station-day averages for Brisbane; our retail records begin on 13 April 2026, so a period before then has the wholesale side only. Last year’s average is the previous calendar year. Until we have a full calendar year of retail prices it shows the wholesale side only: the terminal gate price, crude oil and excise. Its GST, retail difference and margin need a retail price, so they are left out. Terminal gate price: AIP, Brisbane terminal, carried over weekends. Crude oil is the US Energy Information Administration Brent spot price (FRED series DCOILBRENTU), converted to Australian cents a litre at each day’s exchange rate (FRED series DEXUSAL) and 158.987 litres a barrel, then averaged over the days both are published. Excise: ATO, averaged over the period’s days. Wholesale is the terminal gate price without GST and excise, less crude oil. GST is one eleventh of the retail price. The retail difference is what is left: the retailer’s costs and margin, without its GST. Bands are rounded so they add up to the retail price.

Month by month

Brisbane's U91 average moved from 176.4 c/L in July 2026 to 202.2 c/L in August 2026 and 222.3 c/L in September 2026, while diesel went from 205.2 c/L to 247.6 c/L and 271.8 c/L over the same months. The U91 average started the period at 157.7 c/L on 1 July 2026, peaked at 238.1 c/L on 24 September 2026, and ended at 235.9 c/L on 30 September 2026.

The gross indicative retail margin is the retail average less the terminal gate price, both with GST. It is before the retailer's own costs (rent, wages, freight to the site, card fees), so it is not profit. The terminal gate price is AIP's price at the Brisbane terminal. AIP publishes terminal gate prices for the capital-city terminals only, so a regional town is measured against the capital's terminal, and its margin includes the cost of getting fuel there. Weekday prices are carried over weekends and public holidays.

Market trends this year

The terminal gate price in Brisbane averaged 194.2 c/L for unleaded and 231.9 c/L for diesel. Brent crude oil averaged 86 Australian cents a litre, with an exchange rate of 70.62 US cents per Australian dollar.

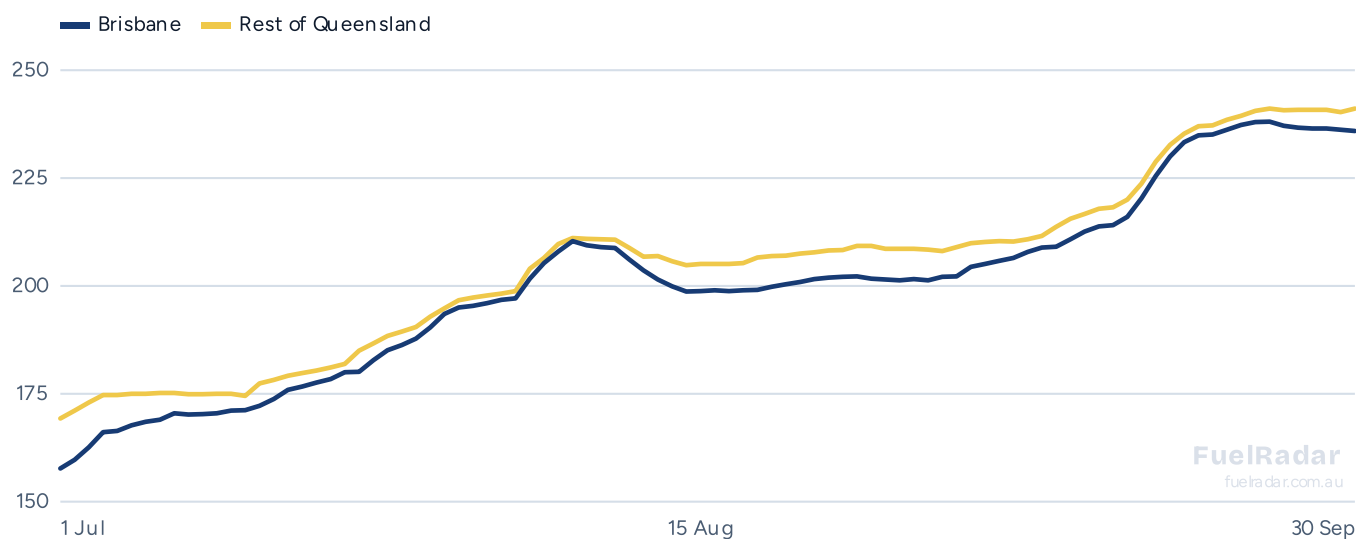

Retail: FuelRadar daily averages for Brisbane, from 13 April 2026 when our records begin. Terminal gate prices (dashed): AIP, Brisbane terminal, weekdays. Brent crude: US EIA spot price via FRED, converted at each day's exchange rate and 158.987 litres a barrel.

US cents per Australian dollar, the Federal Reserve's noon buying rate in New York, via FRED.

The price cycle and excise

No regular price cycle ran in Brisbane in the period and prices followed wholesale costs. The sharp rises came with the excise change on 1 July 2026, the excise change on 3 August 2026, and the terminal gate price.

Sharp rises in Brisbane's U91, not hikes	From	To	Rise	TGP change	Came with
1	1 July	9 July	+12.8	-0.5	Excise change, 1 July
2	22 July	6 August	+30.3	+25.3	Excise change, 3 August
3	10 September	20 September	+24.3	+16.8	Terminal gate price

How we count a price-cycle hike: Brisbane's daily U91 average less the Brisbane terminal gate price (the indicative margin) rises by at least 8.0 c/L within 5 days, the retail average rises as much, stations making up at least 25% of Brisbane's raise their price by 5.0 c/L or more in a day, and the margin then eases back by half within 21 days. A rise within 3 days of an excise change, or one the terminal gate price explains, is not a hike. With no hike, no regular price cycle ran and prices followed wholesale costs.

Fuel excise

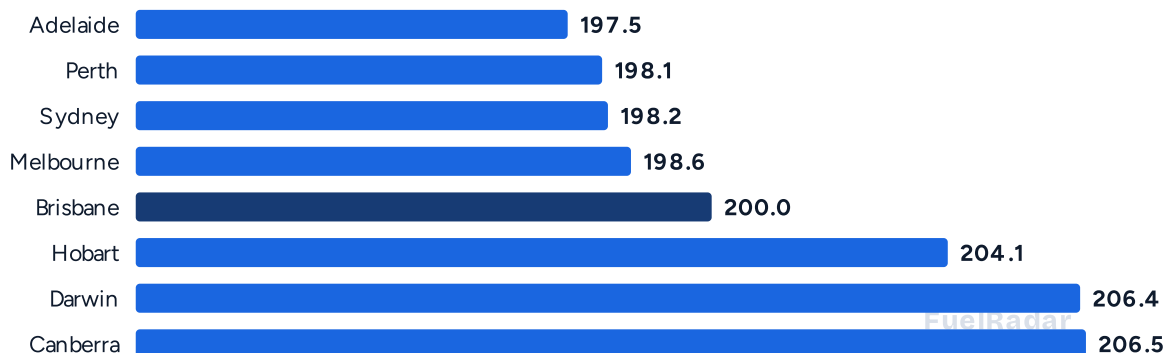

The fuel excise rate changed twice in the period, rising to 36.6 c/L on 1 July 2026 and to 53.7 c/L on 3 August 2026.

Petrol and diesel excise	Rate (c/L, before GST)	Change
In force on 1 July 2026	36.6	
From 1 July 2026 (Partial restoration; still a temporarily reduced rate, 1 July to 2 August 2026)	36.6	+16.0
From 3 August 2026 (Full rate restored, indexed by the CPI factor of 1.020)	53.7	+17.1
Average over the days of 1 July to 30 September 2026	47.6

Excise is charged on fuel as it leaves the terminal, so it is already in the terminal gate price; GST is then charged on top.

The capital cities

Brisbane was the fifth cheapest of the 8 capital cities for U91 and the fifth cheapest of the 8 capital cities for diesel. Adelaide was the cheapest capital for both fuels, while Canberra was the dearest.

Each capital is its ABS urban area, worked out exactly as in its own state's report. The margin is against its own terminal's gate price (Canberra uses Sydney's). Green is the cheapest capital and red the dearest.

Brisbane by area

Brisbane South was the cheapest of Brisbane's ABS SA4 areas for U91 at 197.1 c/L, while Moreton Bay South was the dearest at 203.2 c/L. This gave a spread of 6.1 c/L across the capital's areas.

Areas are the ABS Statistical Areas Level 4 (SA4, 2021) inside Brisbane's urban area, named in plain words ("Brisbane - East" is Brisbane East). An area counts its stations that reported on at least a quarter of the days; its average, station count and cheapest station all come from them, so the cheapest station never averages more than its area.

Regional towns

Yarraman was the cheapest town for U91 at 191.6 c/L, while Quilpie was the dearest at 240.8 c/L, creating a spread of 49.2 c/L. For diesel, Yarraman was again the cheapest at 227.3 c/L and Thargomindah was the dearest at 291.9 c/L. In total, 48 of the 157 ranked towns were cheaper than Brisbane for U91, and 61 of 134 towns were cheaper for diesel.

A town is the ABS locality a station sits in; a station in a large regional city (marked "city") counts in that city as one place. A town is ranked with at least 2 stations that reported on a quarter of the days and a price on 60% of the days. Its margin is against Brisbane's terminal gate price, so it includes the cost of carrying fuel to the town.

Regional centres

Hervey Bay (50,000 to 99,999 people) was the cheapest regional centre for U91 at 197.3 c/L, while Emerald (10,000 to 19,999 people) was the dearest at 224.1 c/L. Nine regional centres averaged less than the capital for U91.

Each day's average against the seven days centred on it, averaged by weekday, so a steady rise or fall over the period does not favour one end of the week. A place needs four of each weekday with prices from 5 stations or more; a month usually has too few, so it shows the year so far only.

A 60-litre tank, and the towns that moved most

Filling a 60-litre tank with U91 in Yarraman rather than Quilpie saved \$29.52, and saved \$5.04 against the Brisbane average. Buying at Ampol Kawana Waters Diesel Stop in Warana saved \$11.34 a tank against the state average.

Brent: Europe Brent spot price FOB (US Energy Information Administration). Exchange rate: the Federal Reserve's noon buying rate in New York. Both via FRED, Federal Reserve Bank of St. Louis, averaged over the days each is published; the Australian-dollar figures use each day's rate. A litre is a barrel ÷ 158.987. We use these free benchmarks because the refined-petrol and diesel benchmarks Australian wholesale prices follow (Singapore) are sold by subscription.

Outlook

An estimate, not a guarantee. Our outlook describes the days after the period ended. Prices can move quickly; check the live price at the station before you fill.

We give our outlook only in the days after a period ends, when it still describes the days ahead. See today's forecast for your area in the FuelRadar app or at fuelradar.com.au/fuel-price-reports/qld/2026-q3.

Data quality, method and sources

We collected prices from 1,746 service stations across the state, with our price records starting on 13 April 2026.

Service stations listed	1,776
Stations that reported a price in the period	1,746
Station-days counted (every fuel)	524,819
Days covered	1 July 2026 to 30 September 2026
Our price records begin	13 April 2026
Towns ranked for U91 (left out: too few steady stations)	157 (254)

The station-day average

Each day, every service station counts once at its latest price as of the end of that day, in the state's own time. A price is carried forward for at most 30 days, and each average is taken over every station-day in the period. Prices held for checking, prices a station reported as unavailable and implausible prices are left out (we count U91 between 100.0 and 450.0 c/L).

Places

Brisbane is its ABS urban area, split into ABS SA4 areas. Outside it, a town is the ABS locality a station sits in. A town or area counts its stations that report on at least a quarter of the days and is ranked with at least 2 of them and a price on 60% of the days.

Wholesale, margins and the cost of a litre

The terminal gate price is AIP's weekday price at the nearest terminal: the Brisbane terminal. AIP publishes the capital-city terminals only. Weekday prices are carried over weekends, and a period's price is the mean of its calendar days. The margin is the retail average less the terminal gate price. Crude oil is the US Energy Information Administration Brent spot price (FRED series DCOILBRENT EU), converted to Australian cents a litre at each day's exchange rate (FRED series DEXUSAL) and 158.987 litres a barrel, then averaged over the days both are published. In the cost of a litre, wholesale is the terminal gate price without GST and excise less crude oil, excise is the ATO rate averaged over the days, GST is one eleventh of the retail price, and the retail difference is the rest. Last year's average is the previous calendar year. Until we have a full calendar year of retail prices it shows the wholesale side only: the terminal gate price, crude oil and excise. Its GST, retail difference and margin need a retail price, so they are left out.

About these prices

These are averages over the whole period, not today's prices. Check the station price and its update time before you fill. The full report, with every town linked to its live prices, is at fuelradar.com.au/fuel-price-reports/qld/2026-q3.
