Cents a litre. Change is on the June quarter 2026, which covers the days from 13 April, when our full price history starts. Difference is the rest against Melbourne.

Melbourne averaged 198.6 c/L for U91 and the rest of Victoria 203.1 c/L, so the rest of Victoria paid 4.5 c/L more than Melbourne. Melbourne averaged 240.5 c/L for diesel and the rest of Victoria 242.8 c/L, so the rest of Victoria paid 2.3 c/L more than Melbourne.

What makes up a litre in Melbourne

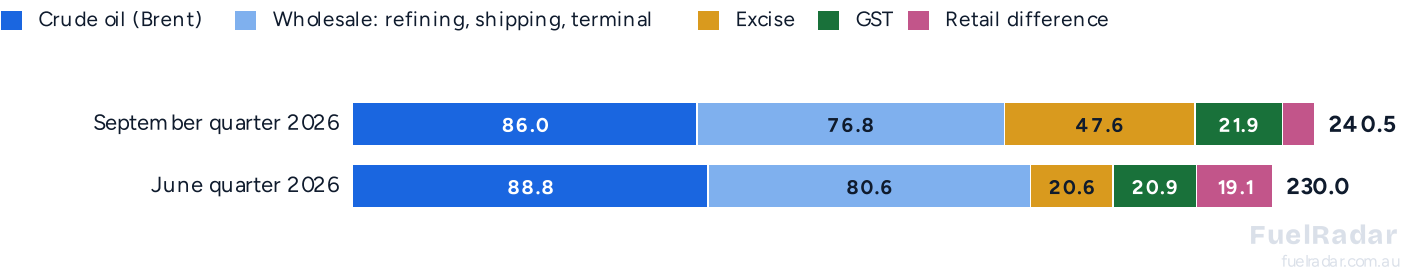

Of the 198.6 c/L U91 average in Melbourne, crude oil was 86.0 c/L, wholesale 41.4 c/L, excise 47.6 c/L, GST 18.1 c/L and the retail difference 5.5 c/L. Of the 240.5 c/L diesel average in Melbourne, crude oil was 86.0 c/L, wholesale 76.8 c/L, excise 47.6 c/L, GST 21.9 c/L and the retail difference 8.2 c/L. Premium 95 has no terminal gate price of its own, so its breakdown uses the unleaded price and its premium sits in the retail difference. Our retail records begin on 13 April 2026, so earlier periods show the wholesale side only.

Premium 95 has no terminal gate price of its own. We use the unleaded price, so the premium grade’s extra wholesale cost sits in its retail difference, and we give no margin for it.

Retail: FuelRadar station-day averages for Melbourne; our retail records begin on 13 April 2026, so a period before then has the wholesale side only. Last year’s average is the previous calendar year. Until we have a full calendar year of retail prices it shows the wholesale side only: the terminal gate price, crude oil and excise. Its GST, retail difference and margin need a retail price, so they are left out. Terminal gate price: AIP, Melbourne terminal, carried over weekends. Crude oil is the US Energy Information Administration Brent spot price (FRED series DCOILBRENTU), converted to Australian cents a litre at each day’s exchange rate (FRED series DEXUSAL) and 158.987 litres a barrel, then averaged over the days both are published. Excise: ATO, averaged over the period’s days. Wholesale is the terminal gate price without GST and excise, less crude oil. GST is one eleventh of the retail price. The retail difference is what is left: the retailer’s costs and margin, without its GST. Bands are rounded so they add up to the retail price.

Month by month

Melbourne's daily U91 average went from 155.7 c/L on 1 July to 234.1 c/L on 30 September, and diesel from 178.6 c/L to 283.2 c/L. The highest daily average in Melbourne was 234.7 c/L for U91 on 23 September and 287.9 c/L for diesel on 24 September. Melbourne's U91 average was 174.1 c/L in July, 201.9 c/L in August and 220.3 c/L in September. Melbourne's diesel average was 204.0 c/L in July, 248.0 c/L in August and 269.6 c/L in September.

The gross indicative retail margin is the retail average less the terminal gate price, both with GST. It is before the retailer's own costs (rent, wages, freight to the site, card fees), so it is not profit. The terminal gate price is AIP's price at the Melbourne terminal. AIP publishes terminal gate prices for the capital-city terminals only, so a regional town is measured against the capital's terminal, and its margin includes the cost of getting fuel there. Weekday prices are carried over weekends and public holidays.

Market trends this year

The Melbourne terminal gate price averaged 192.5 c/L for unleaded and 231.4 c/L for diesel, up 20.9 c/L and up 22.4 c/L on the June quarter 2026. Brent crude averaged US\$96.3 a barrel, or 86.0 c/L in Australian dollars, with the Australian dollar at an average of 70.62 US cents.

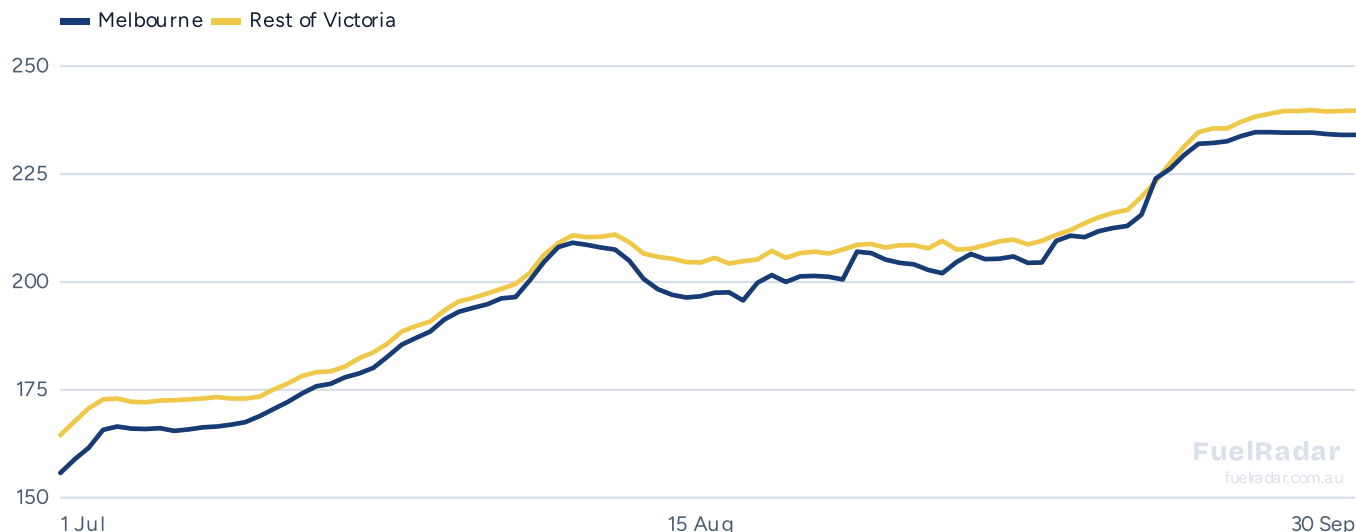

Retail: FuelRadar daily averages for Melbourne, from 13 April 2026 when our records begin. Terminal gate prices (dashed): AIP, Melbourne terminal, weekdays. Brent crude: US EIA spot price via FRED, converted at each day's exchange rate and 158.987 litres a barrel.

US cents per Australian dollar, the Federal Reserve's noon buying rate in New York, via FRED.

The price cycle and excise

No regular price cycle ran in Melbourne in the September quarter 2026: U91 prices followed wholesale costs. Melbourne's three sharp rises in the U91 average came with the excise changes and a rise in the terminal gate price, so we do not count them as price-cycle hikes.

Sharp rises in Melbourne's U91, not hikes	From	To	Rise	TGP change	Came with
1	1 July	5 July	+10.8	+1.2	Excise change, 1 July
2	14 July	6 August	+41.6	+38.2	Excise change, 3 August
3	8 September	18 September	+24.9	+22.3	Terminal gate price

How we count a price-cycle hike: Melbourne's daily U91 average less the Melbourne terminal gate price (the indicative margin) rises by at least 8.0 c/L within 5 days, the retail average rises as much, stations making up at least 25% of Melbourne's raise their price by 5.0 c/L or more in a day, and the margin then eases back by half within 21 days. A rise within 3 days of an excise change, or one the terminal gate price explains, is not a hike. With no hike, no regular price cycle ran and prices followed wholesale costs.

Fuel excise

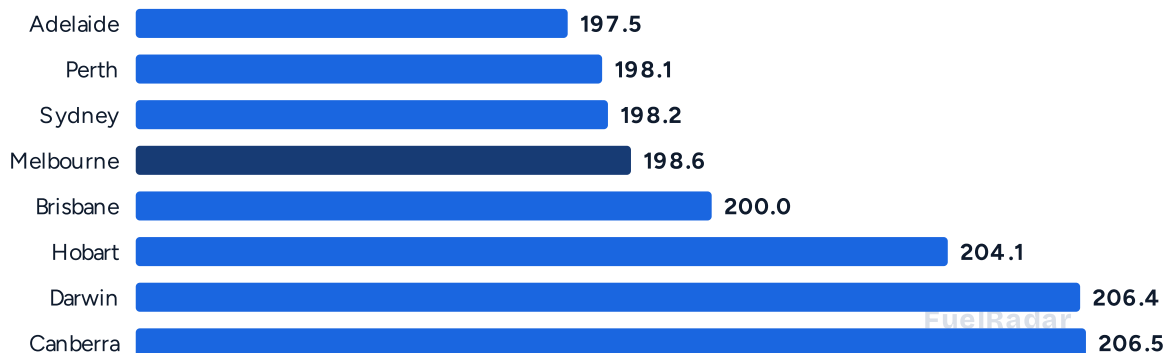

Fuel excise on petrol and diesel changed from 20.6 c/L to 36.6 c/L on 1 July 2026 and from 36.6 c/L to 53.7 c/L on 3 August 2026. Over the period it averaged 47.6 c/L a litre, before GST.

Petrol and diesel excise	Rate (c/L, before GST)	Change
In force on 1 July 2026	36.6	
From 1 July 2026 (Partial restoration; still a temporarily reduced rate, 1 July to 2 August 2026)	36.6	+16.0
From 3 August 2026 (Full rate restored, indexed by the CPI factor of 1.020)	53.7	+17.1
Average over the days of 1 July to 30 September 2026	47.6

Excise is charged on fuel as it leaves the terminal, so it is already in the terminal gate price; GST is then charged on top.

The capital cities

Melbourne ranked fourth cheapest of the 8 capital cities for U91; Adelaide was the cheapest at 197.5 c/L and Canberra the dearest at 206.5 c/L. Melbourne ranked fourth cheapest of the 8 capital cities for diesel; Adelaide was the cheapest at 233.9 c/L and Canberra the dearest at 248.2 c/L.

Melbourne by area

Inside Melbourne, Melbourne West was the cheapest area for U91 at 197.3 c/L and Melbourne Inner South the dearest at 200.5 c/L, a spread of 3.2 c/L.

Areas are the ABS Statistical Areas Level 4 (SA4, 2021) inside Melbourne's urban area, named in plain words ("Brisbane - East" is Brisbane East). An area counts its stations that reported on at least a quarter of the days; its average, station count and cheapest station all come from them, so the cheapest station never averages more than its area.

Regional towns

White Hills was the cheapest regional centre for U91 at 187.0 c/L, 11.6 c/L below Melbourne. Tallangatta was the dearest at 233.9 c/L, 35.3 c/L above Melbourne. 20 of the 120 towns we ranked averaged less than Melbourne for U91. Epsom was the cheapest regional town for diesel at 230.2 c/L and Avoca the dearest at 275.0 c/L, a spread of 44.8 c/L.

A town is the ABS locality a station sits in; a station in a large regional city (marked "city") counts in that city as one place. A town is ranked with at least 2 stations that reported on a quarter of the days and a price on 60% of the days. Its margin is against Melbourne's terminal gate price, so it includes the cost of carrying fuel to the town.

Regional centres

Moe–Newborough was the cheapest of the 32 regional centres we ranked for U91 at 194.0 c/L, and Castlemaine the dearest at 215.7 c/L. 11 of them averaged less than Melbourne.

Each day's average against the seven days centred on it, averaged by weekday, so a steady rise or fall over the period does not favour one end of the week. A place needs four of each weekday with prices from 5 stations or more; a month usually has too few, so it shows the year so far only.

A 60-litre tank, and the towns that moved most

Filling a 60-litre tank with U91 in White Hills rather than Tallangatta saved \$28.14 on average in the September quarter 2026. In White Hills the same tank cost \$6.96 less than in Melbourne. At Metro Petroleum Carlton in Carlton, the cheapest station we ranked, it cost \$11.40 less than at the state average.

Brent: Europe Brent spot price FOB (US Energy Information Administration). Exchange rate: the Federal Reserve's noon buying rate in New York. Both via FRED, Federal Reserve Bank of St. Louis, averaged over the days each is published; the Australian-dollar figures use each day's rate. A litre is a barrel ÷ 158.987. We use these free benchmarks because the refined-petrol and diesel benchmarks Australian wholesale prices follow (Singapore) are sold by subscription.

Outlook

An estimate, not a guarantee. Our outlook describes the days after the period ended. Prices can move quickly; check the live price at the station before you fill.

We give our outlook only in the days after a period ends, when it still describes the days ahead. See today's forecast for your area in the FuelRadar app or at fuelradar.com.au/fuel-price-reports/vic/2026-q3.

Data quality, method and sources

We counted 1,729 stations that reported a price, over 562,507 station-days. Our price records begin on 13 April 2026.

The station-day average

Each day, every service station counts once at its latest price as of the end of that day, in the state's own time. A price is carried forward for at most 30 days, and each average is taken over every station-day in the period. Prices held for checking, prices a station reported as unavailable and implausible prices are left out (we count U91 between 100.0 and 450.0 c/L).

Places

Melbourne is its ABS urban area, split into ABS SA4 areas. Outside it, a town is the ABS locality a station sits in. A town or area counts its stations that report on at least a quarter of the days and is ranked with at least 2 of them and a price on 60% of the days.

Wholesale, margins and the cost of a litre

The terminal gate price is AIP's weekday price at the nearest terminal: the Melbourne terminal. AIP publishes the capital-city terminals only. Weekday prices are carried over weekends, and a period's price is the mean of its calendar days. The margin is the retail average less the terminal gate price. Crude oil is the US Energy Information Administration Brent spot price (FRED series DCOILBRENT EU), converted to Australian cents a litre at each day's exchange rate (FRED series DEXUSAL) and 158.987 litres a barrel, then averaged over the days both are published. In the cost of a litre, wholesale is the terminal gate price without GST and excise less crude oil, excise is the ATO rate averaged over the days, GST is one eleventh of the retail price, and the retail difference is the rest. Last year's average is the previous calendar year. Until we have a full calendar year of retail prices it shows the wholesale side only: the terminal gate price, crude oil and excise. Its GST, retail difference and margin need a retail price, so they are left out.
